

# Shoreline Master Program Update

## Community Meetings

For the cities of Lacey, Olympia, and Tumwater

### What is happening?

The cities of Lacey, Olympia, and Tumwater have prepared updated shoreline regulations for public review. Updating the regulations is a requirement of the State Shoreline Management Act.

### Why should you care?

Whether you own a home or business on a shoreline, river, or lake, or you enjoy the waters of the Puget Sound, how the cities manage our shorelines is important to you!

### Your input is needed!

Please take a look at the material on our website - [www.trpc.org](http://www.trpc.org) - or call and ask us to mail you a copy of the materials, then give us your insight on any part of the draft regulations, including:

- Public access requirements
- Shoreline residential setbacks
- Vegetation plan requirements
- Shoreline environmental designations

### Too busy to attend a meeting?

We know you're busy. If you can't attend a meeting, please send us a short email or letter with your input. We'd love to hear from you!

### What will happen next?

This is the first step in public review of the draft regulations. After taking your comments and making revisions, we expect the draft regulations to go through a formal adoption process in 2010-2011. Public comment will also be taken during that time.

### How do you contact us?

To provide input please attend one of the meetings, or send written comment to:

Steven W. Morrison, Senior Planner  
Thurston Regional Planning Council  
2424 Heritage Park SW, Suite A  
Olympia, WA 98502
