

TRANSPORTATION FUNDING

Between 2020 and 2045, Thurston County communities will collectively spend more than \$212 million each year preserving and improving our transportation system.

What will we be spending our transportation dollars on?

\$120M on public transportation (Intercity Transit and Rural Transit) – including transit facilities, buses, vans, and service

\$93M on local streets, roads, bridges, and shared use trails

\$18M on transportation projects that have regional impacts including freeway interchanges, new roads and connections, and new shared use trails

\$17M on administration costs and the interest on project loans and bonds

\$38M on maintaining and preserving existing streets and roads

\$20M on local projects including sidewalks, bike lanes, roundabouts, and turn lanes

Where does funding for our local streets, roads, bridges, and shared use trails come from?

69% from local sources including property taxes, sales taxes, and transportation benefit districts

25% from state sources including grants and the state fuel tax

6% from federal sources including grants and FEMA funding

Regional 'To-Do' List:

- ❑ Prioritize the maintenance and preservation of the existing transportation system to minimize life-cycle costs.
- ❑ Use transportation funding policies and investments to make development decisions predictable, fair, and cost effective.
- ❑ Support efforts to improve the availability, predictability, and flexibility of transportation revenues for all modes.
- ❑ Continue local policies that require new development to pay for its impacts on the transportation system.
- ❑ Make strategic transportation investments that reinforce land use and transportation decisions consistent with the goals and policies of the Regional Transportation Plan.

HOW DOES THE REGIONAL TRANSPORTATION PLAN (RTP) ACCOUNT FOR TRANSPORTATION FUNDING?

Funding is vital to keeping our transportation system functioning well. The RTP is a financially constrained plan – meaning there must be enough revenue to fund ongoing needs – including regional projects.
